

# LBRY Credits Climbing As "Blockchain-Based Netflix-Killer" Beta Is Released

conda (67) ▾ (/@conda)in #blockchain (/trending/blockchain) • 5 years ago (edited)

It would be easy to let the amazing EOS news (<https://steemit.com/eos/@eosio/draft-eos-token-sale-smart-contract>) overshadow other developments in crypto today, but something HUGE happened in a quieter corner of the crypto world. LBRY, one of the most ambitious blockchain projects ever, released a very promising beta.

Imagine taking some of the best aspects of Steemit, Netflix, Youtube and Torrents, and mashing them together into a blockchain based multimedia platform. That would be a start towards understanding what LBRY could be, and it's already showing huge potential.

LBRY today emailed it's beta testers and early adapters with news of its newest incarnation, and so far, it's kicking ass.

 11121212.JPG

LBRY allows you to share your media for free, or for whatever charge you set, as well as watching free or premium content. LBRY credits play a central role, and since recent developments have shown such promise, the value of these credits has been climbing rapidly.

LBRY already attracted some controversy this year when 20,000 previously deleted (from YouTube) UC Berkeley lecture videos were added to the blockchain. [\[1\]](#)

I spent some time with the latest release today and it is running spectacularly well. Where older versions were slow and buggy, this is extremely elegant software, more similar in feeling to YouTube than Netflix, for better or worse. Certainly more options than Netflix, but far more straightforward than YouTube. I hope the minimal theme is retained going forward. I was able to upload an mp3 (a song of my own creation) and set a price. It was worryingly easy! Personally, I'm very excited to see where this project goes.

COHERENCE - Official Theatrical Trailer (HD)-Oscilloscope Laboratories  
@oscopelabs

OPEN

On the night of an astronomical anomaly, eight friends at a dinner party experience a troubling chain of reality bending events. Part cerebral sci-fi and part relationship drama, COHERENCE is a tightly focused, intimately shot film that quickly ratchets up with tension and mystery.

Its hard when I go back and look at all the time I bought bit coin to buy weed off of the darknet. I see me paying \$10 a coin \$100 a coin and so on. Now if I actually kept that money instead of buying drugs I'd be a millionaire.

FUCK MY LIFE LOL

I hear ya man. The crypto world is full of hindsight. I sold the last of my Bitcoin a couple of years ago to buy a shitty camera lens. I powered down Steem for months because I thought the platform was dying. I sold hundreds of Ripple at around 2 cent. FML too.

Lol sorry to here that sir. Seeing I kept on loosing my bit coin wallets - back in the day of course, I am pretty sure I lost at least 20 - 50 bitcoins by just loosing my login information. Originally it was so little I didn't even care . But now looking back, I really get mad . At least you got to sell yours and didn't just outright lose them in a stoned stupor like I did.

Even if it doesn't kill Netflix, YouTube on the block chain would be king. Another revenue stream like Patreon for video makers would be amazing.

Now we just need one for stills photographers. ;)

Nice! I've been waiting for LBC to come around. It was the first alt I ever bought so I've been holding it kind of as a good luck charm or something. A couple months ago I started scooping up more and more.

So the beta is live? I didn't know. I'm on the early access list and haven't received any news. I should probably head over to the website. I haven't been over there in a bit. There is great potential for growth though. I really like the whole idea of cutting out any sort of middle man.

I imagine I must have signed up for early access before you, so you might have to wait a few days before being notified but they seem to be rolling things out pretty fast now. The early beta was lousy, but this one is rather impressive.

Wow, this is the most exciting cryptocurrency of them all for content producers. This is huge. You are right, this is really hot. I don't just want to buy this, I want to USE it!

I think I will make a video about this today with my new show Coin Puppet:
